Data Engineer with focus on:
Cloud-Scale Data Platforms

WHO AM I?

The most influential event of my life was when I got my first notebook. I got it when I was ten years old. Since then I never stopped learning about various elements of the digital world. I just wanted to know how things work and this curiosity rooted a path for me which leads through many industries and studies. I am curious what the future might bring.

EXPERIENCE

- 04/2026 – Current **Software Architekt** **BEKO (Dedicated to the City of Vienna)**
At Beko my primary customer is the City of Vienna. There I spearheaded the modernization and feature expansion of a mission-critical Document Management System (DMS). It's a dynamic project where I am working together with my team, on connecting the service to a personalized in-house AI Chatbot. I lead the containerization and cloud-native transformation of the legacy application for deployment on Red Hat OpenShift. At last, we migrated core identity and access management systems to Microsoft Entra ID, enhancing security compliance and user authorization workflows.
LLMs / LangGraph / OpenShift / ArgoCD / JavaEE / SpringBoot / Python
- 06/2020 – 03/2026 **Development Lead and Integration Specialist** **MSD**
Merck Sharp & Dohme primarily creates medicine and therapies for the people in need. To become more efficient in doing so I work with them to get ready for the technologies of tomorrow. This transformation enables MSD Austria to become a true data driven company. To do so we have used advanced analytics techniques, to help our business, making the right decisions.
LLM & Langchain / AWS Sagemaker, Glue & Terraform / Apache Airflow / Dataiku / React JS / Kubernetes / Redshift & Apache Spark / Python & PyTorch / R & Shiny / PowerAutomate & PowerBI
- 07/2018 – 05/2020 **Full Stack Developer / Hybrid Cloud Engineer / DevOps** **IBM Client Innovation Center**
At IBM I have been located in the ministry of the interior, primarily. I learned how to deal with a rather conservative client and how to open them up to the technologies the present supplies. Within the company I employed and moderated a reoccurring learning event called **WeLearn**, which gave many IBM employees a platform for an open learning experience.
Openshift / JavaEE / Vue.js / Kubernetes / Python / DB2 / z/OS

- 10/2016 – 05/2018 **Full Stack Developer / System Admin (Linux)** **IBQ**
part time
My former employer and I worked on a platform called LearnLinked which enables organizations as well as private persons to schedule and manage their learning courses and certificates. Many customers were related to the public sector, hence opening me the doors to this field which I enjoyed at IBM.
Python & Django / Angular / Couch DB / Linux / Docker & Container management
- 04/2014 – 06/2015 **Software Developer** **APA-IT**
The primary customers for which I worked have been Swarovski, APA (Austrian Press Agency) and the WKO (Wirtschaftskammer Österreich). Swarovski required me to deploy their product on-site in Hall next to Innsbruck. Further, I held developer and editor seminars for the product *Gentics CMS*.
Spring & Hibernate / JavaScript / PHP / Postgres
- 06/2013 – 09/2013 **Back-End Developer** **Irian Solutions**
Before my military service, I developed the backend server for a small project, which was used by front-end interns. This application was called *Monster Math Expedition*. Since the task was quickly done, I developed a prototype each for a NoSQL and SQL database backend. Close to the end I helped out the front-end development team.
Spring / Hibernate / Bigtable / Typescript & PhoneGap

EDUCATION AND CERTIFICATES

- 10/2019 – 06/2026 **Master's Degree** **Technical University of Vienna**
Specialization: Application Architecture and Kubernetes
Thesis: "Designing Cloud Applications for Compatibility: A Case Study on Kubernetes and OpenShift"
- 09/2019 **Red Hat Certified Specialist** **certified by Red Hat**
in OpenShift Application Development on a Red Hat OpenShift Container Platform 3.6
- 10/2015 – 09/2018 **Bachelor of Science Degree** **Technical University of Vienna**
in Medical Informatics with a GPA (Grading Point Average) of 1.9. Relevant courseworks are Software development & Project management, Algorithms and data structures, Mathematics & Statistics, Data modeling & Database systems, Logic, Knowledgebased systems, Internet security, Artificial Intelligence and many more.
- 2008 – 2013 **High School Graduation** **Vienna Institute of Technology (Ger.: Technologisches Gewerbemuseum Wien)**
in Computer Science with an graduation GPA of 1.4 (eq. to 3.72 in U.S.) and final year GPA of 1.16 (eq. 3.9 in U.S.). While in high school I completed extracurricular courses such as the attainment of the Cisco CCNA R&S certificate and a robotic course called Botball. Relevant courseworks are: Programming & Algorithms, Distributed Systems/Databases, Project & Quality Management and many more.

INTERNSHIPS

- 07/2012 – 08/2012 **Robotic Researcher** **Technical University of Vienna (TU Wien)**
The project funded by the TU Wien, required my team to craft hardware with basic Lego and items from the "Botball Educations Robotics Program" set. Meanwhile, I used an industrial camera sponsored by Festo and an ontology to build a network between artificial intelligence agents.
AI Agents / Protégé ontology / Lego robots / Java
- 08/2011 **Web Application Developer** **Irian Solutions**
Irian Solutions has been a strong foot of the *Apache MyFaces* open-source JSF project. While my second internship I did some minor bugfixes of this project and had my first active encounter with design patterns and architectural decisions.
MyFaces / JSF / JavaEE / JPA
- 07/2010 **Software Developer** **AWST (Eng.: Applied Science, Software and Technology)**
At AWST I made my first experiences with projects that have tight time constraints. The application we developed provided an interface for scientific measuring applications. Since the quality had to be consistent, I was assigned to write Unit Tests as well as designing basic form GUIs.
Java / JUnit / Java Swing / JPA & Hibernate

LEADERSHIP, PRESENTATION SKILLS AND VOLUNTEERING WORK

10/2017 – 02/2018	Volunteering Work	RIC – Refugees Code
	Volunteering at a program by the organisation R{C} in cooperation with the TU-Wien. The project they have launched focused on helping people in need by making them ready for the IT job market.	
08/2018	Organisator / Facilitator	Desire to Inspire
	While this one week project I organized with an intercultural Erasmus+ project about leadership in Villach. This project included 26 participants from 9 different countries.	
04/2014 – 10/2014	Project Leader	Gentics
	For our costumer Swarovski I took over the lead of the project <i>Crystal Catalog</i> . The project successfully went live in July 2014.	
2012	IEEE Presentation	Global Conference on Educational Robotics (GCER)
	On an international conference held in Honolulu, Hawaii called GCER I presented my teams work about autonomous robotics developed in the year prior.	
2011 – 2013	Project leader	Vienna Institute of Technology (Ger.: Technologisches Gewerbemuseum Wien)
	Throughout the last two years of graduation I took the lead in various software projects. Most of them were agile projects.

HOBBIES

I love to go for long walks, even when it rains. I go on road biking trips and in general like to learn new things ... like my latest hobby, woodworking.
